

QUICK LOOK-UP

Continuous Flow Production Rates *Output Per Module*

	Cu. Ft	Gal.	Yards	Lbs.
Per Week	5	37	0.2	160
Per Month	22	160	0.8	700
Per Year	250	1,925	10	8,500

Assumes approx. 32lb per cu. ft. Actual amount may vary with moisture level and feedstock type.

Bulk Measures of Vermicompost (approx):

5 gal. (bucket) = 22 - 25 lb

1 cu. ft = 7.5 gal

1 cu. yard = 202 gal = 27 cu. ft

1 ton = 2+ yards

Pre-composting reduces volume and weight

- Food scraps reduce by about 1/2
- Manure + bedding reduce by about 1/4
